

Field Service

Gain a true competitive advantage by providing world-class customer service

Given rapidly changing technology, product proliferation, and ever-shortening product lifecycles, customer service is becoming the key competitive differentiator. For complex manufacturers, your success is determined by how well your field service engineers perform, how quickly they respond to customer requests and how effectively you manage them.

GLOVIA G2 Field Service is designed to overcome the biggest challenge facing manufacturers – delivering world-class customer service while managing field service resources effectively. Field Service provides the information required to manage your field service department: from tracking calls and managing orders to sourcing resources and performing follow-up services.

Field Service helps manufacturers by:

- Increasing customer satisfaction and loyalty
- Generating additional revenue streams
- Reducing preparation time for service orders
- Improving service request responsiveness
- Decreasing field service and material costs
- Increasing utilization of field service engineers
- Improving visibility into service orders and availability of field service engineers
- Eliminating service penalties

Comprehensive Field Service Functionality

GLOVIA G2 Field Service handles all of your customers' service requirements, whether they need service occasionally or 24 hours a day, seven days a week. The solution addresses the service needs of your entire enterprise, enabling you to improve the predictability and accuracy of service cycles so that you can provide excellent customer service.

Integrated Applications

GLOVIA G2 maintains an installation site register that tracks the customer configuration and provides an accurate record for future maintenance and upgrades. Site analysis reports are available at any time for comparison of planned and actual installations. For ongoing service and support, project installations are automatically recognized by the GLOVIA G2 service applications.

Field Service provides comprehensive functionality including:

- The ability to plan and manage services just like materials
- Integration with Service & Repair enables Service quote and contract management including warranty, level of service, and preventative maintenance
- Point-and-click' access to customers' site registers
- Visibility into both existing and planned field service engineer and material availability

Service Call Management

Field Service enables you to manage all incoming field service requests including logging, tracking, monitoring, and responding to service calls. The module allows you to:

- Record customer calls and provide diagnostic tools
- Capture notes concerning service requests
- Assign action statuses to calls
- Assign priorities to service orders
- Assign the most appropriate service provider, based on skill and availability
- Review a service provider's job queue
- Review the status and history of a customer's calls and service orders
- Escalate calls to higher levels of support as needed
- Close service loops by recording details of post-service follow-up calls

Service Engineer Assignment and Monitoring

- Manage dispatch lists and prioritize open service orders
- Update time sheets, report job status, and add comments to service orders
- Generate a daily list of required items based on scheduled service orders
- Manage inventory status by vehicle, including physical inventory
- Issue, track, consume, and automatically replenish repair kits
- Process replenishment requests

Manage Field Service Engineers

Field Service enables you to track and manage your most valuable customer service assets: your field service engineers. The module allows you to plan, maintain and track direct and indirect time through a web-based calendar function. Direct time is automatically

entered when a field service order is executed. Indirect time can be added by simply clicking on the date and appropriate activity. This combination helps you to analyze the utilization and availability of your field service engineers.

Additional Capabilities

Field Service provides key additional capabilities including:

- **Service and Repair Order Tracking:** Provides up-to-the-minute visibility of a customer's order as well as status and reporting capabilities.
- **Integrated Billing:** Supports repetitive or cyclical billing to meet customer preferences for monthly, quarterly, or annual billing as well as billable charges and minimum and maximum amounts.
- **Online History:** Records and archives all service contract and service repair activities including costs, billing, completion, material and labor.
- **Flexible Tables Functionality:** Tailors application to the unique needs of your customers, including user-defined service types, pricing, penalty triggers, and workflows.
- **Proactive Workflow:** Automates service process by defining status codes and triggered actions; enables exception-based management of service orders.
- **Automatic Register Update:** Provides an up-to-date view of customer's product configurations including the latest components installed-down to revision and serial level.
